Hello,

I appreciated this morning's webinar. Great job on this!

Question:

Facility Sharing

Last year our charter school shared energy costs with a separate non-profit that is not an LEA. Our school made out the checks to "PG & E". The school no longer shares the facility, so this will not be an issue going forward. However, energy costs last year will be a shared cost. Should we note this in the Five year plan? Should the school submit the full amount of the energy costs, including the shared costs with the other non-profit that recently moved out?

Thank you for helping with this unique question!
